

# Blender Advanced Features

## Table of Contents

- 1. Blender Fundamentals**
  - a. User Interface & Navigation
  - b. Basic Object Operations
- 2. Modeling Techniques for Product Design**
  - a. Mesh Modeling & Edit Mode
  - b. Surface & Subdivision Modeling
  - c. Modifiers & Non-destructive Workflows
  - d. Sculpting Basics
- 3. Materials & Texturing**
  - a. Shading Fundamentals
  - b. Texture Mapping & UV Unwrapping
  - c. Procedural Textures
- 4. Lighting & Rendering**
  - a. Lighting for Product Visualization
  - b. Rendering Engines
  - c. Rendering Techniques
- 5. Product Design Workflow Integration**
  - a. Design Concepts & Rapid Iteration
  - b. Reference & Blueprint Setup
  - c. Exporting & Interoperability
- 6. Advanced Topics & Specialized Workflows**
  - a. Precision Modeling
  - b. Advanced Surface Modeling
  - c. Simulation & Physics
- 7. Presentation & Portfolio**
  - a. Compositing & Post-Processing
  - b. Creating Product Showcases
  - c. Design Documentation
- 8. Project-Based Learning & Best Practices**
  - a. Guided Projects
  - b. Industry Best Practices
