

# **Implementing Cisco MPLS Traffic Engineering v2.0**

## **1. Understanding Traffic Engineering with MPLS**

Basic Networking Concepts

What Is Traffic Engineering?

Traffic Engineering Before MPLS

Enter MPLS

Using MPLS TE in Real Life

## **2. MPLS Forwarding Basics**

MPLS Terminology

Forwarding Fundamentals

Label Distribution Protocol

Label Distribution Protocol Configuration

## **3. Information Distribution**

MPLS Traffic Engineering Configuration

What Information Is Distributed

When Information Is Distributed

How Information Is Distributed

## **4. Path Calculation and Setup**

How SPF Works

CBR (Constraint based routing)

How CSPF Works

Tunnel Reoptimization

Resource Reservation Protocol (RSVP)

Interarea Tunnels

Link Manager

## **5. Forwarding Traffic Down Tunnels**

Forwarding Traffic Down Tunnels Using Static Routes

Forwarding Traffic Down Tunnels with Policy-Based Routing

Forwarding Traffic Down Tunnels with AutoRoute

Load Sharing

Forwarding Adjacency

Automatic Bandwidth Adjustment

## **6. Quality of Service with MPLS TE**

The DiffServ Architecture

A Quick MQC Review

DiffServ and IP Packets

DiffServ and MPLS Packets

Label Stack Treatment

Tunnel Modes

DiffServ-Aware Traffic Engineering (DS-TE)

Forwarding DS-TE Traffic Down a Tunnel

## **7. Protection and Restoration**

The Need for Fast Reroute

What Is Protection?

Types of Protection

Link Protection

Node Protection

Advanced Protection Issues

## **8. MPLS TE Management**

MPLS LSR MIB

MPLS TE MIB

## **9. Network Design with MPLS TE**

Sample Network for Case Studies

Different Types of TE Design

Tactical TE Design

Online Strategic TE Design

Offline Strategic TE Design

Protection Scalability

Forwarding Adjacency Scalability

## **10. MPLS TE Deployment Tips**

Bandwidth and Delay Measurements

Fine-Tuning MPLS TE Parameters

Migrating IS-IS from Narrow to Wide Metrics

TE and Multicast

Tunnel Identification Schemes

Combining MPLS TE with MPLS VPNs

Deployment Possibilities

## **11. Troubleshooting MPLS TE**

Common Configuration Mistakes

Tools for Troubleshooting MPLS TE Problems

Finding the Root Cause of the Problem
