Process Modeling Using BPMN Course Fact Sheet

Certificate: None

Course Delivery: Classroom

Accreditor: None

Language: English

Course Description: Learn to map your business processes easily and efficiently using the industry standard - BPMN which stands for Business Process Modeling Notation from the Object Management Group (OMG). You will learn the best practices in process mapping using the latest industry standards (BPMN) so that both the business and IT stakeholders will be able to understand the models and map processes consistently through-out your organization. Business analysts follow a professional approach towards understanding the processes, policies and structure of an enterprise by employing a set of tools and techniques in order to recommend the best possible solutions that drive the organization to accomplish its goals

Audience: ● Business Analysts ● Database Administrators ● Systems Analysts ● Data Modelers ● Process Modelers

Learning Objectives: Individuals at this level will have demonstrated their ability to:

● Provide a solid foundation for applying business process modeling principles and best practices with BPMN

● Demonstrate how to solve practical business problems using BPMN Business Process Diagrams (BPDs)

Prerequisites: Business Analysis Essentials and/or Eliciting and Writing Effective Requirements or like experience (BA, writing requirements, and PM).

Course Outline:

Section 1: Introduction

Section 2: An Overview of Governance

Section 3: Mapping the Business Problem

Section 4: Modeling Simple BPMN Structures

Section 5: Modeling Complex BPMN Structures

Section 6: Analyzing Process Models
