

Machine Learning & AI Introduction (RXM402)

This course is lab heavy and provides hands-on experience with a variety of ML libraries and toolkits.

Duration: 1 Day

Prerequisites for this course

Participants should have basic programming skills (preferably in Python), a foundational understanding of mathematics and statistics, some experience with data analysis.

Outline for this course

Chapter 1 – AI/Machine Learning Overview and Data Processing

Chapter 2 - Data Visualization

Chapter 3 - Machine Learning Models

Chapter 4 - Hyperparameter Tuning
