

# VMware AirWatch: Configure and Deploy Integrated Solutions

## Overview:

This two-day course will provide you with the skills required to configure and provision VMware AirWatch® cloud deployments. It will cover the enablement of containerized applications, deployment and management of corporate email, and integration with enterprise resources. You will access hands-on labs and learn best practices for mobile deployment, with a focus on how to deploy and manage VMware AirWatch applications.

Students who complete this course and pass the accreditation exam may enroll in the [VMware AirWatch: Install and Deploy On-Premise Solutions](#) course.

AirWatch Enterprise Mobility: Configure and Deploy Integrated Solutions is also available as an On Demand course. For information on that course, follow this link: [AirWatch Enterprise Mobility: Configure and Deploy Integrated Solutions - On Demand](#).

Product Alignment

- AirWatch® Enterprise Mobility™ 8.4

## Objectives:

By the end of the course, you should be able to meet the following objectives:

- Configure and provision cloud deployments
- Learn VMware AirWatch best practices for mobile deployments
- Integrate with enterprise resources by installing the AirWatch Cloud Connector
- Enable containerized applications to securely connect with back-end resources through use of the AirWatch Tunnel and AirWatch Content Gateway
- Deploy and manage corporate email through integration with Windows PowerShell or through the use of the AirWatch Secure Email Gateway

## Accreditations:

This course prepares you for the following accreditation:

- [VMware AirWatch Professional Accreditation: Enterprise Mobility](#)

## Intended Audience:

Airwatch Administrators, IT Staff, Sales Engineers, Consultants, Support or Helpdesk, Solutions Architects, Solutions Engineers, Airwatch Installers or Implementation Specialists

## Prerequisites:

This course requires completion of the following course:

- [VMware AirWatch: Configure and Manage](#)

## Outline:
