

Koenig rolls out training course on Bitcoin in India

Upon completion, students the learn use of Bitcoin for transactions in an easy hassle free manner

Koenig Solutions Ltd., global leaders in offshore IT Training, announced the launch of a course on 'Bitcoin', the digital currency based on an open source peer to peer software. The latest rage in the online world, Bitcoin is the new financial language of netizens who prefer paying online for goods and services. Designed as a four day programme, the course will be offered from all Koenig centres in India.

In layman terms, Bitcoin is a form of digital currency which is controlled and stored electronically on computers and mobile phones spread across the internet. It's not merely a simple currency but also a means to circulate, share and transact, just like PayPal or VISA. Bitcoin lets you hold money, spend and trade it too, very easily and cheaply. The open source software controlling it operates on a set of mathematical equations and laws — and also by those who collectively manage this service.

Commenting on the new launch, Mr. Rohit Aggarwal, CEO and Founder, Koenig Solutions Ltd, said, "Koenig Solutions sees this as a great opportunity from which students and professionals in India and abroad can realize huge benefits. Participants enrolled for this Bitcoin course will understand what Bitcoin is, the complete process of Bitcoin mining, how to generate Bitcoins, and how they are changing the face of current online payment systems. They will learn to use Bitcoins for transactions in an easy hassle free manner".

The course shall cover topics and skillsets such as Fundamentals of Bitcoin, Bitcoin Cryptographic, Bitcoin Transactions, Bitcoin Mining, Bitcoin Block, Bitcoin Working, Secure Trading with Bitcoin, Bitcoin Protocol Specification, Introduction to wallet, Securing Wallet, Securing Transaction with Bitcoin, Limitation of Bitcoin and the Future of Bitcoin Building Financial System.

"Bitcoin holds promise for millions of internet users looking to simplify their payments and transactions in the online marketplace. Since almost everyone is a neophyte in this relatively new technology, it necessitates the need for Bitcoin training so as to get the most out of this e-currency service", Subodh Chaudhary, GM, Koenig Solutions.

Everyone is curious about this new form of monetary exchange. It's a new vision and the new face of international finance, something so powerful that breaks down national barriers and frees currency from control of federal governments. In order to tap the maximum potential of this service, it is essential to first understand it in detail. Bitcoin course will acquaint all participants with core knowledge about its working and operations.

Also, appended are some facts on Bitcoin for your consideration:

Bitcoin has clear potential for growth as a medium of exchange and the currency of future. Even Bank of America deems Bitcoin as the next big thing. US Retailer Overstock.com now accepts Bitcoin. Even a Lamborghini dealership in California sold their Tesla model in exchange of Bitcoins. Blogging platform Wordpress, social news site Reddit, and billionaire entrepreneur Richard Branson's space travel outlet Virgin Galactic - everyone is embracing this country-independent digital currency. Facebook has started testing Bitcoin payments for their advertisement platform. So you see, in any sphere, wherever you look, Bitcoin is emerging in a big way and its acceptance expanding at a high rate.

In the United States, more than 700,000 retail outlets accept bitcoin, including retail chains like 7-11 and Wal-Mart. And in France, workers can choose to have their salaries paid in this new digital currency. The best part or the most significant reason why Bitcoin is hugely popular, is that banks can't manipulate its prices. It is free from control of federal governments and hence, inflation-free!
